INVESTOR TEASER | CONFIDENTIAL

THE PROBLEM

- Rising grid costs — Commercial tariffs hit £0.086/kWh; VAT climbing to 20% by 2026.
- The CAPEX Wall — A standard 200-space solar carport costs ~£262K upfront. Operators on leased premises have no appetite to own energy infrastructure.
- Split incentives — Tenants pay bills; landlords own the roof. Deals die at feasibility.

THE SOLUTION

SunPark finances, builds, owns, and operates modular solar canopies over commercial parking lots. Clients sign a 20-year Power Purchase Agreement at £0.069/kWh — no upfront cost, no asset liability, no maintenance. We own the asset, carry all risk, and collect recurring energy revenue for the life of the contract.

WHY NOW

- Law 82-21 (2023) — Morocco's first framework for third-party PPAs and commercial self-generation.
- SR500 Programme — Morocco–Switzerland initiative targeting 500 MW of commercial solar by 2030.
- Green finance aligned — IFC & Crédit du Maroc announced a $100M green lending facility.
- 18.9% CAGR — Morocco's solar market growth rate (IRENA 2024).

MARKET OPPORTUNITY

Bottom-up analysis of Morocco's commercial sector identifies ~1,000 viable sites across retail, logistics, hospitality, and offices — representing a £260M total addressable market at £260K per installation. Target segments: retail chains, logistics operators, hotel groups, and office complexes.

BUSINESS MODEL

A single repeatable logic: fund → build → own → sell cheaper electricity → collect 20-year contracted revenue. Capital structure: 70% green-bank project debt / 30% equity per site. Each SPV is self-financing against its own contracted PPA cashflows, enabling disciplined portfolio scaling without repeated equity fundraising.

UNIT ECONOMICS (per 760 kWp site)

£87K	86.5%	4 Yrs	63.9%
Annual Revenue	EBITDA Margin	Payback (unlevered)	Levered IRR (20yr)

THREE-YEAR FORECAST

	Y1 (2026)	Y2 (2027)	Y3 (2028)
Sites operational	1	9	17
Revenue	£86K	£777K	£1.5M
EBITDA	£75K	£672K	£1.3M
EBITDA margin	86.5%	86.5%	86.5%
Net income	£41K	£373K	£722K

PORTFOLIO MILESTONES

- **Breakeven · 4 sites · £340K ARR**
  Anchor chain LOI signed
- **Series A Ready · 20 sites · £1.7M ARR**
  Reference-led expansion
- **Exit Ready · 50+ sites · £4.25M+ ARR**
  Infrastructure fund acquisition

COMPETITIVE ADVANTAGE

SunPark is not a solar company — it is a retail energy contract company. No structured competitor in Morocco currently combines PPA financing, full asset ownership, multi-site O&M, and the ability to operate on leased commercial premises under a single standardised contract.

- First-mover under Law 82-21 — 12+ months of regulatory engagement; ONEE relationships built.
- Standardised PPA template — Dissolves the split-ownership blocker; repeatable, bankable.
- Asset ownership model — 20-year contracts create deep switching costs and contracted revenue.
- Local market depth — Moroccan founder; French and Arabic fluency; direct retailer access.

HOW WE COMPARE

	SunPark	EPC Installer	Grid
Upfront cost to client	£0	£262K	£0
Client owns asset	No	Yes	N/A
Client maintains	No	Yes	N/A
Cost vs grid	−20%	−20%*	Baseline
Contract certainty	20yr	None	Variable

* After 7-year payback period

TRACTION & VALIDATION

- 12 months of expert-led market discovery across Morocco — zero structured retail EaaS providers found.
- Pilot site secured — Agadir logistics warehouse; SOLAROC (EPC partner) engaged with quotation-backed cost model.
- Policy tailwind confirmed — Law 82-21 operational; SR500 active; IFC–Crédit du Maroc $100M facility aligned.
- Failure modes mapped — Model designed specifically to dissolve the three structural blockers preventing solar adoption.

GO-TO-MARKET

Direct B2B enterprise sales targeting facilities directors, CFOs, and procurement heads at retail chains, logistics operators, and hotel groups. Phase 1: warm-network pilot in Agadir. Phase 2: reference-led outreach to commercial chains. Phase 3: framework agreements enabling multi-site rollout from a single negotiation.

THE TEAM

CAPITAL RAISE

£420,000

Seed | Convertible Note

Instrument	Convertible Note
Valuation Cap	£2.6M
Discount	20%

USE OF PROCEEDS

£341K Company capital — legal, regulatory, commercial, feasibility, contingency

£79K Site SPV equity — triggers £184K green-bank debt; funds Agadir pilot installation

WHAT THIS ROUND DELIVERS

- Agadir pilot site live (Month 12)
- Two independent follow-on customer LOIs signed
- Standardised PPA template & ONEE approvals in place
- Series A readiness within 18 months
