

SunPark

INVESTOR TEASER

Solar Carport as a Service

Turning commercial parking into clean energy infrastructure across Morocco, with no upfront client capex.

THE PROBLEM

Rising grid costs: commercial tariff benchmark is GBP 0.086 per kWh and rising.

The capex barrier: a standard carport costs around GBP 260K upfront for operators.

Split ownership between tenants and landlords blocks commercial solar decisions.

THE SOLUTION

SunPark finances, builds, owns, and operates modular solar canopies over commercial parking. Clients sign a 20-year Power Purchase Agreement at GBP 0.069 per kWh in the source model. Zero upfront cost, no asset liability, and no maintenance responsibility.

WHY NOW

- Law 82-21 created Morocco's first framework for third-party PPAs and distributed self-generation.
- Installations below 5 MW use a simplified licensing pathway.
- SR500 programme targets 500 MW of commercial and industrial solar by 2030.
- Commercial grid tariff VAT rises to 20 percent in 2026 under the Finance Act.
- Morocco solar sector growing at 18.9 percent CAGR (Grand View Research, 2025).

MARKET OPPORTUNITY

Source analysis references around 1,000 viable commercial sites across retail, logistics, hospitality, and office sectors in Morocco, representing a total addressable market of GBP 260M at GBP 260K per installation.

BUSINESS MODEL

Repeatable capital model: fund, build, own, operate, and collect contracted revenue. Source model references 70 percent project debt and 30 percent equity per site. Each site SPV is self-financing.

UNIT ECONOMICS (PER SITE, BASE CASE)

GBP 87K Annual Revenue	~86% Gross Margin	~2 Years Equity Payback	GBP 2.2M 20yr Revenue
----------------------------------	-----------------------------	-----------------------------------	---------------------------------

THREE-YEAR FORECAST

Metric	Y1 2026	Y2 2027	Y3 2028
Sites operational	1	9	17
Revenue	GBP 86K	GBP 777K	GBP 1.5M
EBITDA	GBP 75K	GBP 672K	GBP 1.3M
Gross margin	~86%	~86%	~86%
Net income	GBP 41K	GBP 373K	GBP 722K

PORTFOLIO MILESTONES

- **Breakeven**
4 sites, GBP 340K ARR. Anchor chain LOI signed.
- **Series A Ready**
20 sites, GBP 1.7M ARR. Reference-led expansion underway.
- **Scale Ready**
50 plus sites, GBP 4.25M plus ARR. Infrastructure fund opportunity.

COMPETITIVE ADVANTAGE

SunPark is not a solar company. It is a commercial energy contract company. No structured competitor currently combines PPA financing, full asset ownership, multi-site operations, and the ability to operate on leased commercial premises under one standardised contract in Morocco.

- First-mover under Law 82-21 with 12 plus months of regulatory engagement.
- Standardised PPA template dissolves the split-ownership blocker.
- Asset ownership creates 20-year contracted revenue and high switching costs.
- Moroccan founder with direct retailer access and French and Arabic fluency.

HOW WE COMPARE

Dimension	SunPark	Local Inst.	Ind. PPA	In-house
PPA financing	Yes	No	Bespoke	No
Retail contracts	Yes	No	No	No
Multi-site rollout	Yes	No	No	No
Full O&M; included	Yes	No	No	Yes
Works on leased site	Yes	Rarely	No	No

TRACTION AND VALIDATION

- Twelve months of structured market discovery is documented in source material.
- Agadir logistics warehouse identified as pilot candidate; SOLAROC engaged as EPC partner.
- Law 82-21 operational and SR500 active; green bank debt pathway identified for site-level SPVs.
- Model designed to resolve three structural adoption blockers identified in discovery work.

GO TO MARKET

Direct B2B outreach to facilities directors, CFOs, and procurement heads. Phase 1 is a pilot in Agadir. Phase 2 is reference-led outreach to commercial chains. Phase 3 enables multi-site rollout from a single framework negotiation.

THE TEAM

- Youssef Commercial access and PPA negotiations. Moroccan founder with direct retailer relationships.
- Fariha Financial model, capital structure, and SPV architecture. PwC Assurance background.
- Akilesh Technical feasibility, system sizing, and EPC oversight. Commercial PV design background.
- Sybil Operations, regulation, and stakeholder coordination. Management consulting background.
- Ahmad Partnerships, investor access, and regional expansion mapping.

CAPITAL RAISE

GBP 420,000

Seed convertible note

Instrument	Convertible note
Valuation cap	GBP 2.6M
Milestone	First pilot live, two follow-on sites secured, rollout capital ready.

USE OF PROCEEDS

- GBP 341K** Company operations covering legal, regulatory, commercial development, feasibility, and contingency reserve.
- GBP 79K** Site SPV equity unlocks GBP 184K of project debt to fund the Agadir pilot installation.

WHAT THIS ROUND DELIVERS

- Agadir pilot site live by month 12.
- Standardised PPA template and ONEE approval package finalised.
- Series A readiness positioned within 18 months.
